**Subject: LANTEK® 6/7 Cable Certifier**

Dear Ed,

NORDX/CDT has completed the evaluation of Ideal Industries' LANTEK® 6/7 Cable Certifier. We are pleased to announce the approval of this test equipment for use in the performance verification up to 300 MHz of NORDX/CDT's IBDN GigaFlex 1200, 2400 and 4800LX cabling systems.

The evaluation was made in our laboratories using the *LANTEK® 7 Cable Certifier*, the *firmware version 2.0* and the *Lantek reporter software version 3.009*. The results obtained correlate with the high performance values of our IBDN GigaFlex cabling systems.

For permanent link testing of NORDX/CDT's IBDN GigaFlex 1200, 2400 and 4800LX cabling systems, we recommend the use of a 2 m (7 ft) GigaFlex PS6+ modular cords.

We look forward to continued cooperation in working hand-in-hand with Ideal Industries inc. in the future.

Sincerely,

Julie Roy, RCDD/LAN  
IBDN systems, applications and standards Manager
