IDEAL INDUSTRIES, INC.
9145 Balboa Avenue
San Diego, CA 92123

Attention: Mr. Ed Pivonka

Dear Ed,

The LANTEK 6/6a/7/7G has established TIA 568B Level III accuracy that has been independently verified by Intertek Testing Services of ETL Semko. Based on this independent verification of Level III accuracy, we believe that the LANTEK 6/6a/7/7G LAN Cable Certifiers are suitable to verify the compliance of SYSTIMAX/Uniprise SCS installations with the relevant Permanent Link and Channel limits in TIA-568B-B.2-1, ISO/IEC 11801, and EN 50173. The relevant limits are Category 6/Class E for GigaSPEED XL and Uniprise Ultrapipe/Ultramedia installations and Category 5e/Class D for PowerSUM and Ultra II/Datapipe installations.

In characterizing the installations, the LANTEK 6/6a/7/7G must be operating with the latest firmware available from the Ideal technical support web site and use SYSTIMAX/Uniprise SCS patch cords as test leads.

Best Regards,

A handwritten signature in black ink, appearing to read "Richard Y. Mei", with a long horizontal flourish extending to the right.
